

PIRIT™ WATER LINE USER INSTRUCTIONS

- Use only with a UL approved GFCI outlet or GFCI extension.
- Before using this hose make sure the washer is placed inside the female coupling.
- This hose is NOT designed to provide freeze protection to your water supply, be sure to take appropriate measures to protect your water supply.
- Constructed with FDA approved materials for potable water.
- Do not leave hose coiled or spooled for more than 30 minutes when plugged in.
- Use caution: this is an appliance and should be treated and respected as such.

The **PIRIT™ Water Line** is designed for the consumer who wants to maintain a water line 24/7. The **PIRIT™ Water Line** should be plugged in and left to provide a constant water supply.

TO PROVIDE CONTINUED PROTECTION AGAINST ELECTRIC SHOCK:

- Have a qualified electrician install a properly grounded receptacle outlet, acceptable for outdoor use and protected from snow and rain, immediately adjacent to the location where the heater will be used.
- Route the supply cord and locate the heater so as to be protected from damage by live stock.
- Do not use extension cords.
- Inspect cord before using.
- Unplug heater at receptacle outlet when not in use.
- Store hose indoors after winter season.
