Automatically breaks barking, even while you're away

The humane solution for pet control

Accomplish the most effective pet and animal control safely and humanely inside the home and outdoors with Amtek products.

(Protected by US and World Patents)

Scraminal™

Using space age technology, Scraminal detects a pet's body heat and movement. When pets enter the "off limit" area, Scraminal emits loud beeps that repel Pets away safely and humanely. Scraminal keeps pets off and away from furniture, kitchen areas, plants and dangerous areas, Scraminal is portable and operates up to one year on a single 9 volt battery.

AMTEK
Animal Behavior Products™

Keeps Pets Off!

TM

Scraminal

Congratulations on purchasing the Scraminal; especially developed for safe and humane training.

1. This product has been 100% inspected and tested during manufacture and prior to shipment.
2. Follow "Easy to Use" instructions below.
3. If unit fails to operate, replace battery.

No special tools or skills are required. Carefully read through these instructions before using the product. With the Scraminal you'll be able to keep pets off furniture, plants and away from danger.

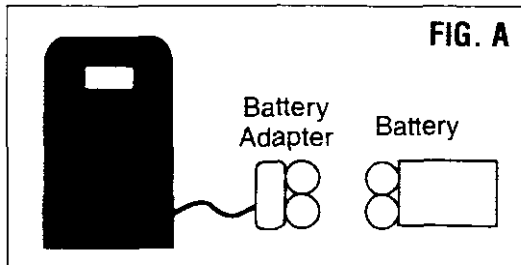

Battery Installation

(One 9-volt battery required)

Slide the **back** of the unit open and connect a 9-volt alkaline battery to the battery adapter.

(See fig. A.)

Note: Replace battery of least once a year and **check** for proper operation.

It's Easy to Use

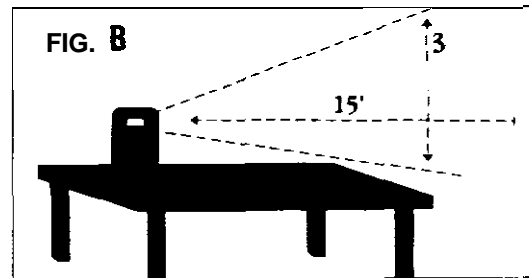

Using heat sensors, Scraminal detects pets as they enter off-limit areas. Scraminal will emit a series of short high-pitched beeps, which repel your pet and train it to stay away. The unit then automatically resets to guard against the next intrusion.

Scraminal can train pets to stay away from dangerous areas like stoves, appliances, balconies, machinery or open entry ways.

Mount the Scraminal where the animal must cross the sensor path. Allow 30 seconds for the Scraminal to warm up. Keep clear of sensor area. (See Fig. B.) The

Scraminal safely conditions domestic animals to stay away from any off-limit area. Safe to use around children, too

To accurately test the Scraminal, cross through the detection pattern instead of toward the unit. The maximum detection range is 15 feet.

Amtek products safely and humanely stop barking and other behavior problems. Pet and animal control, inside and outside the home, is accomplished safely and effectively. Amtek products are tested and approved by veterinarians, animal behaviorists and thousand of satisfied pet owners. So look for our other great pet training products.
