

HOME THEATER MASTER[®]

Entertainment Made Simple[™]

Preprogrammed and Learning LCD Screen Remote Control

"I developed a fondness for Home Theater Master MX-500, a device that has quickly achieved This Year's Model status in remotecentral.com. Without dispensing with the familiar feel of a traditional remote, the MX-500 has an enormous amount of smarts built in and lets you program just about any button to do just about anything you want to do."

Lee Gomes, The Wall Street Journal

"Wow!! All my expectations are met. What I didn't expect was the simplicity of the remote. Not in programming or special features. But this remote has fewer buttons than my other learning remotes and is easier to use, easier to find the buttons, easier period. And still far more powerful."

MX-500 Owner

"The MX-500 can best be described as a very powerful yet amazingly simple-to-use remote control. It's obvious that a lot of thought and refinement went into the physical and operational design. The Home Theater Master MX-500 is the epitome of good design and reigns as the best hard buttoned remote I've so far has the pleasure of using."

Remotecentral.com

"In a word, the MX-500 is amazing! It is so diabolically simple that it's almost scary!"

MX-500 Owner

"I find the MX-500 easier to live with on a daily basis than a lot of twice as expensive units."

Home Theater Interiors

MX-500

This is the Last Remote Control You Will Ever Need

The Home Theater Master MX-500™ is one of the most sophisticated home entertainment products on the market. The MX-500 has been designed to provide a new standard in remote control and infrared technology offering a very powerful and flexible preprogrammed, learning, menu-driven product that can be easily customized to match your home entertainment system. The features and expanded functionality and the sleek ergonomic design of the unit make the MX-500 the perfect remote control for your entertainment system.

EASY TO PROGRAM

With the MX-500 you have the option of programming the unit for up to ten home entertainment components by using either the extensive preprogrammed code library in the remote control (over 1,000 codes) designed to operate practically all the Audio, Video and Home Entertainment components on the market or by learning commands into MX-500 from your original remote controls.

LEARNING CAPABILITIES

Teach up to 530 commands into the MX-500 from your original remote controls with an intuitive, simple and reliable programming sequence.

CONTROLS 10 DEVICES

Input Selection on 10 Device Buttons. Select audio/video receiver inputs and change device modes with simple one button press. Control any of the following components:

<i>A/V Receivers</i>	<i>Personal Video Recorders (Replay and TiVo)</i>
<i>Preamplifiers</i>	<i>DVD & Laser Player/Recorder</i>
<i>Surround Processors</i>	<i>DDS, DBS and C-Band Satellites</i>
<i>Tape, Mini Discs and DAT Decks</i>	<i>A/V Switchers</i>
<i>CD Players/CD Changers</i>	<i>Line Doublers</i>
<i>Cable Boxes</i>	<i>Lighting Controls</i>
<i>TV's and Projectors</i>	<i>Home Automation</i>
<i>VCR's and Camcorders</i>	
<i>Internet/PCTV Devices</i>	

CUSTOMIZED LCD SCREEN

Edit text of 10 device LCD buttons on high resolution screen to match your home entertainment system.

26 LCD SCREENS WITH CUSTOMIZED TEXT

Each of the 10 devices has two pages of LCD screens for complete control of expanded component functions such as PIP, video inputs, timers, and menu features.

50 FAVORITE CHANNEL BUTTONS

50 favorite channel buttons can send out up to 10 commands each for the most frequently watched channels.

ERGONOMIC DESIGN

Advanced ergonomic design of the remote control and the strategically located buttons and joystick makes it a pleasure to operate and access expanded device functions.

MX-500 SCREEN AND BUTTON LAYOUT

- | | |
|------------------------------------|---|
| 1 System Off Button | 7 Power On and Off Button |
| 2 Display Device Name and Function | 8 Backlight Button for LCD Screen and Buttons |
| 3 Change 26 LCD Screens | 9 10 Device Function Buttons |
| 4 Volume Control | 10 50 Favorite Channel Button |
| 5 Joystick | 11 Channel Control |
| 6 Macro Buttons | 12 8 Transport Control Buttons |

MX-500 CLONING FEATURE

The MX-500 allows for seamless transfer of all programmed commands and LCD text to a second MX-500.

MACRO OPERATIONS

The system macro, (M1, M2 and M3) buttons and power on and off buttons can send out up to 20 commands each and the 10 device buttons can send out up to 20 preprogrammed commands.

PUNCH THROUGH OPERATIONS

You can program punch through operations to any of the 10 devices from any other device for volume, channel and transport (Play, Stop, Rewind and Fast Forward) control.

BACK LIT

Bright "EL" illumination on all buttons and LCD screen.

ENERGY EFFICIENT

Batteries last over 6 months under normal usage.

MEMORY BACK-UP

Built in memory back up system prevents memory loss even after removal of the batteries for several months.

BATTERIES INCLUDED

Includes 4 AAA alkaline batteries. One Year Warranty.
